

SPECIFICATIONS SOILBIZ EMV 8

Soilbiz vibratory hammers are designed and fully manufactured in the Netherlands. The wide product range of Soilbiz was developed with more than 25 years of experience in the field of deep foundations. The vibratory hammers of Soilbiz have excellent performance because of their great hydraulic power. The Soilbiz vibratory hammers are the best match between high quality and project driven design.

SOILBIZ EMV 8 excavator mounted vibratory hammer

Eccentric moment	8 kgm
Frequency	2300 rpm
Centrifugal force	464 kN
Amplitude incl. UC clamp	17 mm
Max static line pull	120 kN
Max Oil flow	189 ltr/min
Max operating pressure	350 bar
Overall length	1.380 mm
Width	765 mm
Total weight w/o clamp	1.255 kg
Universal Clamp	60 tons
Weight incl. clamp	1.520 kg
Recommended excavator	22-40 ton
Optional 2m JIB	
Extra reach	2 mtr
Weight	650 kg
Quick coupling type	CW 45
